

Every single € raised will make a difference to people with cancer and their families throughout Ireland in the fight against cancer.

Cancer will affect one in three people during the course of their lifetime. However, more people are surviving cancer due to early detection and advances in treatment.

This year, over 30,000 people in Ireland will develop cancer and over 8,000 will die of the disease

- €3 can help us print 10 Reduce the risk of cancer booklets
- €20 can help provide cancer support and information through our helpline or website.
- €40 could buy a pair of primers used to amplify detectable amounts of DNA for genetic analysis and cancer diagnosis
- €60 can offer four lifts for a cancer patient, taking them to and from hospital for chemotherapy treatment.
- €100 can ensure continuous investment in our cancer research
- €350 provides an Irish Cancer Society Night Nurse for a night to care for cancer patients across the country in their own home during the last days of their life
